Strength through co-operation

Hooklift Systems

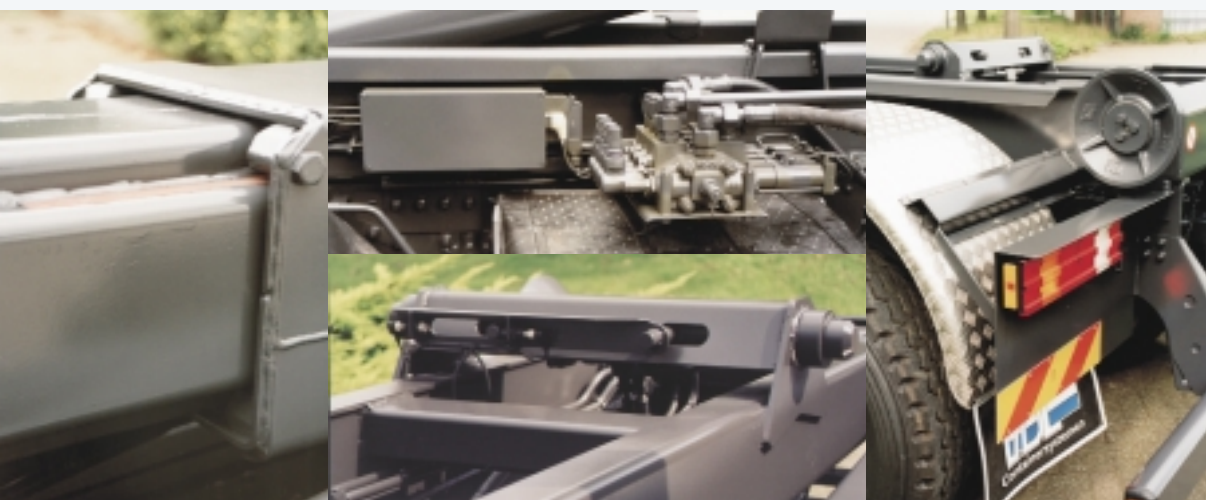

Product Features

- CE marked
- high degree of reliability
- high degree of safety
- high tipping stability
- exceptional low weight-high strength ratio
- rapid return of investment
- low cost of ownership
- high strength steel
- pneumatic cabin controls
- hydraulic control valve
- separate section mounted
- central rear axle-construction with drop-forged casting rear-rollers

Product Line

- capacity to 40 tons
- installation length up to 7200 mm
- bodies to 8000 mm
- sliding and sliding tilting hook systems
- trailers and agricultural carriers
- low height applications
- several locking and safety features
- adjustable hook height features
- continuous support frame for crane mounting
- rapid operation
- hydraulic demounting system
- several lifting hook models
